GANG STALKING

Gang Stalking a.k.a. **Community Mobbing** or **Cause Stalking** is organised harassment of an individual flagged as a troublemaker. Members of the community are warned about the target and asked to casually aggravate and "keep an eye on" the victim.

Targets are often slowly sensitised to everyday stimuli so that they can be harassed undetectably in public, and won't be able to give a believable account of their treatment without seeming unstable.

Participants are usually everyday people concerned about keeping their community safe. Unfortunately, people are often tagged for standing against corporate interests or for petty reasons like personal revenge.

Most people who take part in gang stalking are unaware that the objective is to cut off all lines of support for the target and that they are taking part in organised murder.

Victims of gang stalking are often opponents of corporations, whistle-blowers and protestors.

The saddest part is that this process is intended to eliminate the voices that are there to protect us from unscrupulous businesses and politics.

What can you do to help? Don't participate in unofficial "community policing". Don't repeat or act upon unsubstantiated rumours. We have a right to be safe from predators. This does not give us license to become predators.
